The Leader in Augmented Reality Mapping

**INFoRMATIoN IS PoweR**

The ARS Augmented Reality System is the most advanced mission management system available, offering a radical improvement in situational awareness.

In addition to fast display of mapping information and incorporation of satellite and synthetic imagery, ARS composites addresses, street names, parcel data and any other GIS information of interest directly on top of the live sensor video.

The ARS composited map/video image increases crew effectiveness and simplifies user workload, as all information necessary for the mission is available on a single display. This allows the operator to stay focused on the sensor target, instead of looking away for mapping and location information.

Added features such as perimeter mapping, uploading and saving marker locations and the ability to load customized and user specific imagery and data, make this the ultimate system for Law Enforcement, Fire, Search and Rescue, EMS, Pipeline and Utility companies.

**FEATURES:**

- Labeled Streets, Addresses, Business Names and Parcels Over Live Video
- Fastest-Search Location Look-up
- Immediate Display of Nearest Street, Cross-Street and Business Name
- Place an Unlimited Number of Geo-markers
- Track Speed of Vehicles on Land or Water
- Multiple Orientation Views
- Import Predefined Mission Targets
- Proven Gimbal Interfaces Include: L-3 Wescam, FLIR Systems, Axsys, Gyrocam, and many more...
- Search Light Control
- Compact and Lightweight (less than 5.9 lbs.)
- 100% Money Back Satisfaction Guarantee

**DETAILED MAP IMAGERY:**

- High Resolution Aerial Imagery
- Enhanced USGS Topographic Charts
- FAA Sectional Terminal Area Charts
- Nautical Charts
- Helicopter Route Charts
- Digital Elevation Models
- Custom & Customer Supplied Data

**DUAL CHANNEL HD/SD DIGITAL VIDEO RECORDER:**

- High Definition (720p, 1080i, 1080p) Recording
- Standard Definition Recording
- Metadata Recording
- Audio Recording
- Simultaneous Playback While Recording
- User Defined Recording Buffer
- Records Using SD or USB Media Sources

**ARS AUGMENTED REALITY SYSTEM TECHNICAL SPECIFICATIONS:**

- Dimensions: 7.1" W x 5" H x 7.8" L
- Weight: 5.9 lbs./2.5 kg
- Power: 28 VDC nom
- Interfaces: 6x RS-232
- 1x RS-422
- 2x Ethernet (GigE)
- 4x HD SDI input
- DVI out
- Display Port out
- VGA out
- 12 & 5 VDC aux out
- Audio in/out (stereo)
- 7x USB
- 2x 2.5" SSD

**UNRIVALED SUPPORT AND WARRANTY**

ARS includes a 3 year warranty on hardware. NO ANNUAL FEE and NO CHARGE for Training, Technical Support, Customization, Custom Data.
